

DISTANCE VS. TIME GRAPHS SPINNER ACTIVITY

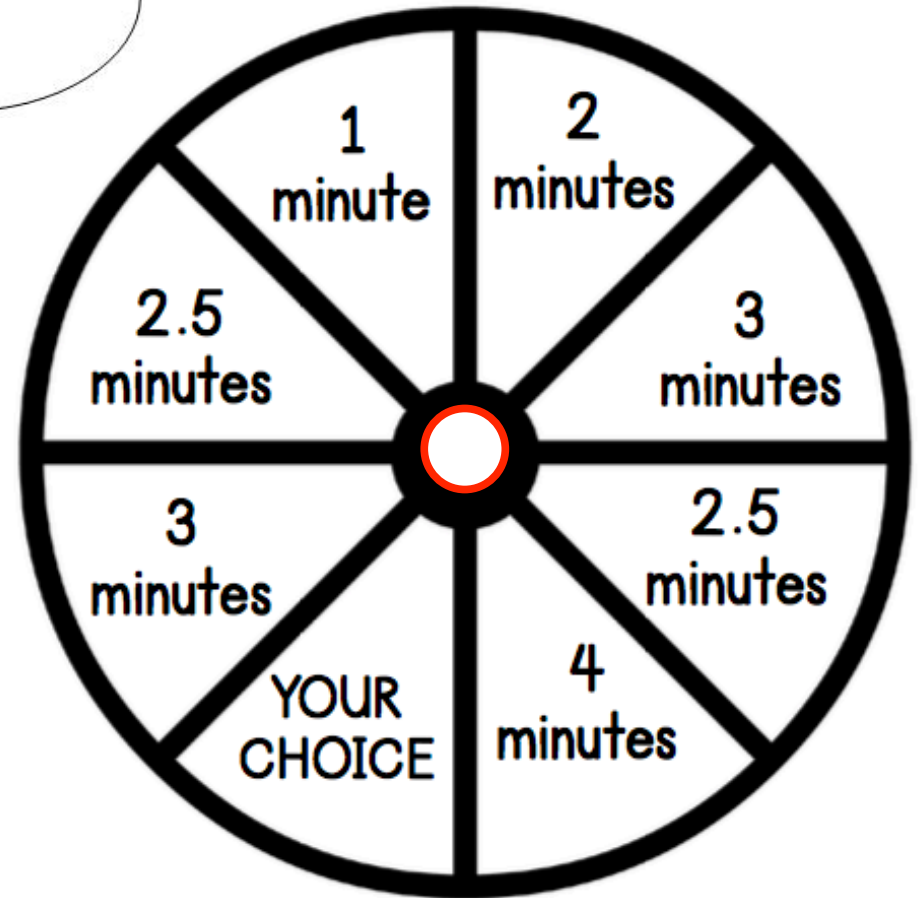

INSTRUCTIONS: Use the spinners below to help you complete your distance vs. time graphs.

ACTIVITY

TIME

Directions: Use the provided paper clip to create a spinner. Place your pencil tip on the inside of the paper clip as shown using the center of the spinner for pencil placement. You will need to alternate between Activity and Time to complete your story problem. Gently spin your paper clip so that it makes at least one full rotation. Write the situation (activity) or number of minutes (time). If you land on YOUR CHOICE, you choose which of the options that you will use for that spin. Then use your complete story to correctly graph what has been described in your story.
